Wash in Schools (WinS)

A project with the Rotary Club of Tangasseri, Kerala, India
Status of Hygiene in Schools

- Only 51% of the schools have designated hand washing space.
- Only 49% of the students washed their hands using only water.
- Only 12% schools have soap/detergent available at the handwashing area.
- Only 32% of the students washed their hands with soap before eating.
What is WinS?

WA = Water

S = Sanitation

H = Hygiene

Toilet
Purpose of Wins

• To build toilets and wash facilities in schools
• To adopt schools for the maintenance of water and sanitation facilities and bring about behavior changes in hygiene habits
• To aim for Swachh Bharat
The old dilapidated toilets at school. Girls students avoid drink water not to urinate because no proper privacy in toilets.

It takes one and a half hours boat ride from the city. Even difficult for Rotarians to get there.
Construction of Toilet
Most people refuse to build toilets for this school on this island because of the cost and the problems of getting the material there.
The Plaque & Finished Toilet
President Lloyd shows water taps.

Dist. Gov. John Daniel attends a ribbon cutting ceremony.
Sanitary Pad Incinerator.

Typical Indian toilet. There are three toilets in the building.
