**Delano Learning Resource Center**

**Campus Need**
Currently the Delano campus consists of one permanent educational building and two relocatable classroom structures. In order to meet student and community needs, the Delano Campus must be expanded. Expansion at the Delano Campus would allow the College to serve the city better and provide more academic services to those who need them.

**Project Proposal**
The project proposal is for a new Learning Resource Center. This building would house several academic functions including a library, study hall, flexible classrooms (capable of holding 32-64 students), a tutoring center (equipped with private tutoring rooms), computer labs, and faculty offices. The library would be the heart of the building, a place where students could study and get the resources they need to further their education. The addition of faculty offices would allow advisors, counselors, and teachers to have an on-site location where students can seek help directly.
