GRACE VAN DYKE BIRD LIBRARY COLLECTION DEVELOPMENT POLICY

Purpose

This policy is intended to guide the development and enrichment of the Grace Van Dyke Bird Library in accordance with the library’s stated mission. Librarians will continue to develop and modify this policy to meet the changing demands of Bakersfield College. The intent of this policy is to define a collection development program to meet the following objectives:

- Provide a current, diverse, and balanced collection of materials to support the curriculum
- Provide access to information resources in appropriate formats
- Encourage faculty participation in collection development
- Serve the Delano Center and distance education students and faculty by providing remote access to materials

Mission of the College Library

The library’s mission is to contribute to and support the college mission by serving as an information and research center and by providing direct instruction and instructional support with a full range of timely information resources. Our primary goals are to help students college-wide to learn and succeed, and to support the college curriculum by serving students, faculty, staff and administration.

Collection Development Responsibility

Collection development is encouraged by all members of the college community. The librarians will recommend or select materials for purchase based on observations made at the Reference desk, reading book reviews or participating on the Curriculum Committee. Standard reviewing journals such as Library Journal or Choice are consulted for appropriate materials.

The librarians also depend on faculty to provide the subject knowledge needed to help build and evaluate the collection. Since the library collection should reflect the curriculum, it is important to have input from all campus departments. Librarians will continue to encourage faculty involvement through the Library Liaison program, the library newsletter and participation on committees, such as Curriculum and FCDC.

Student, staff and community requests for acquisition of materials are also welcomed and encouraged. All suggested titles are reviewed and evaluated by the librarians. The Library Department Chair has final authority in the selection of materials.
Selection Criteria

The library collection will be selected according to the following priorities:

- Materials which directly meet student curricular needs in the courses and/or programs of instruction offered
- Materials which support student papers and reports on a diverse range of topics
- Materials that add depth and breadth to the collection
- Materials which support faculty preparation of class instruction
- Materials which directly support ongoing faculty professional development

Formats of Material Collected

Materials in both print and electronic formats are collected based on the criteria above. The circulating collection of printed books, along with ebooks and subscription databases, are selected primarily to serve the curricular and research needs of community college students.

The reference collection includes encyclopedias, dictionaries, atlases, directories, and statistical information. Reference works are selected to provide an introductory overview of varied subjects.

Generally, textbooks are not purchased due to their high cost and frequent revision. Also, as a general policy, DVDs, CDs, and musical scores are also excluded from purchase but may be added if donated to the library and if they meet established selection criteria.

The print periodical collection includes journals, magazines and newspapers that are not accessible through online databases, or that are accessible through online databases but are heavily used. Microform versions of certain newspapers and journals will continue to be collected.

Donations

The library accepts donations of materials when space and staffing are available to allow for processing. All donations are accepted with the understanding that they are added to the collection only after they have met the same selection criteria as materials which are purchased. The library reserves the right to add or not add donated items as appropriate. Items not added to the collection will either be sold as used books or discarded.

If requested by the donor, he/she will receive a donation acknowledgement letter. The letter will include the number of volumes donated, but will not include a monetary value of the donation, unless determined by the donor.

Weeding

To maintain a well-balanced and useful collection, librarians will continually evaluate the collection and withdraw, update, and repair titles. Discipline faculty will be invited to
participate in this exercise as they are the experts in their subject matter.

**Intellectual Freedom**

The library supports the American Library Association’s Library Bill of Rights. It is the responsibility of the librarians and faculty selecting materials to ensure that all points of view are represented in the collection and that materials are not removed or excluded from the collection because of an individual’s or group’s disapproval of the content matter.

**Policy Review**

This policy will be reviewed and updated as necessary in order to reflect the changing information environment.

**Policy updated February, 2021**
