Trailer provides opportunity to students to learn about possible STEM careers after college

On September 18, 2018 an Army Science, Technology, Math and Science (STEM) Trailer will be on the Bakersfield College main campus to provide an opportunity for students to learn about possible STEM careers after college. The Army STEM Trailer will be located at the sidewalk between the Science and Engineering building and the old Library (Quad) from 8:00 a.m. – 4:00 p.m.

The Army STEM Trailer is a multi-million-dollar technology demonstrator, which has hands on simulators illustrating the science and technology that goes into equipping modern soldiers, including robotic systems and night vision. The purpose of the event is to provide students with an understanding of the practical implications of STEM research and illustrate how the Army integrates evolving technology to improve the safety and effectiveness of soldiers. The trailer also provides an opportunity for students to learn about possible careers after college.

Bakersfield College offers a rigorous and supportive learning environment that fosters students’ abilities to think critically, communicate effectively, and demonstrate competencies and skills in order to engage productively in their communities and the world, while simultaneously contributing to the intellectual, cultural, and economic vitality of the communities it serves.
